# Search Console Query Bucketing

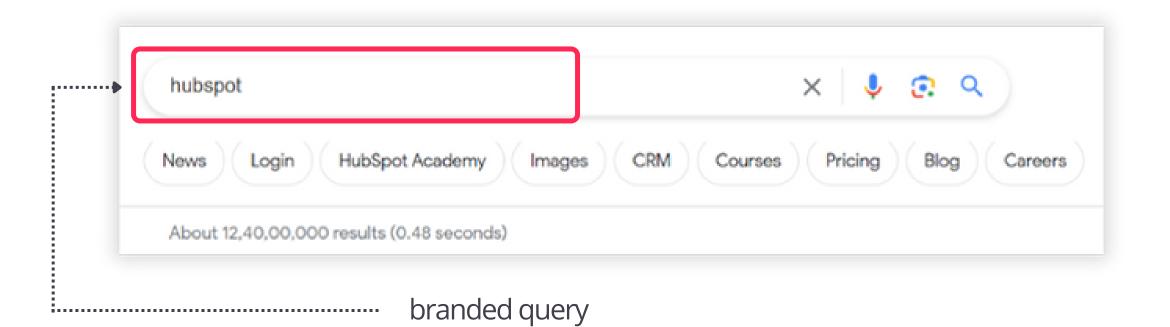

hello@thereyougrow.in

- a. Branded Queries
- Non-Branded Queries
- C. Question Queries
- d. Transactional Queries
- e. Informational Queries
- f. Navigational Queries
- **g.** Long-Tail Queries

## a. Branded queries

When a user searches a brand with its name, it's a branded query.

#### regex to find brand and variations

### \b(brand1|brand2|brand3)\b

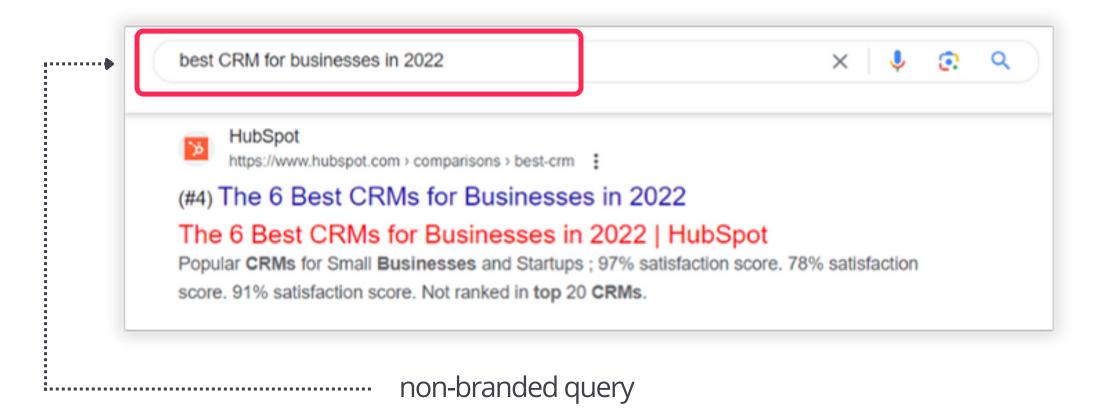

| Query          |                    |             |
|----------------|--------------------|-------------|
| FILTER         | COMPARE            |             |
| Custom (regex) | ₩ How to use regex |             |
| Matches regex  |                    |             |
|                |                    |             |
|                |                    | CANCEL APPL |

| 382 | 733   |
|-----|-------|
| 78  | 137   |
| 1   | 6,724 |

## b. Non-Branded Queries

When the user searches anything other than your brand to find you, it's a non-branded query.

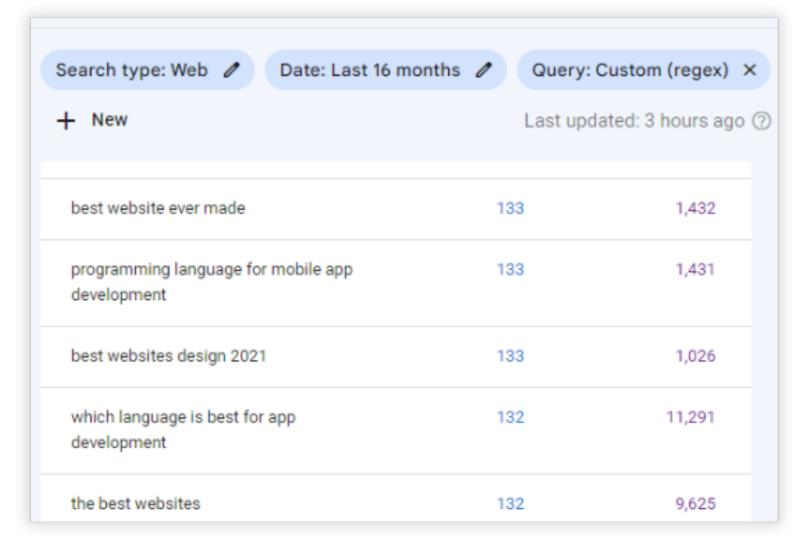

#### regex to find brand and variations

#### \b(brand1|brand2|brand3)\b

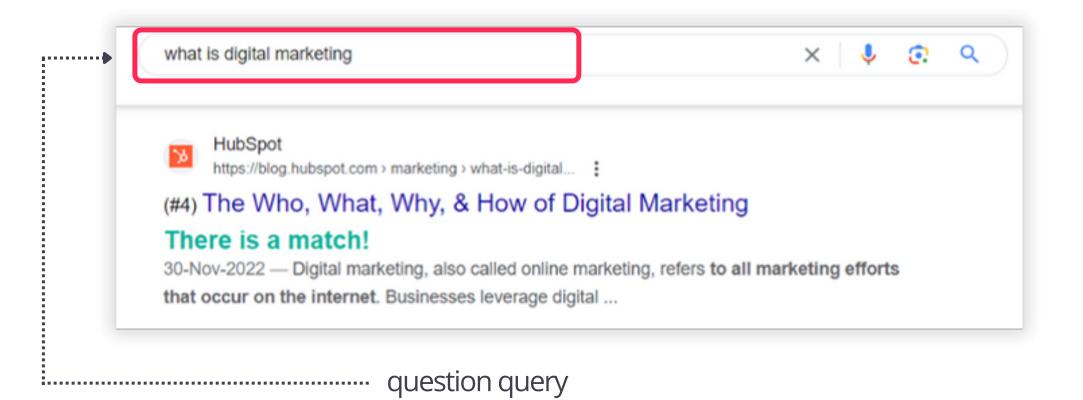

| Query                 |                  |        |       |
|-----------------------|------------------|--------|-------|
| FILTER                | COMPARE          |        |       |
| Custom (regex)        | How to use regex |        |       |
| Doesn't match regex 🔻 |                  |        |       |
|                       |                  |        |       |
|                       |                  | CANCEL | APPLY |

## c. Question Queries

When the user uses questions to reach your website, they are question queries.

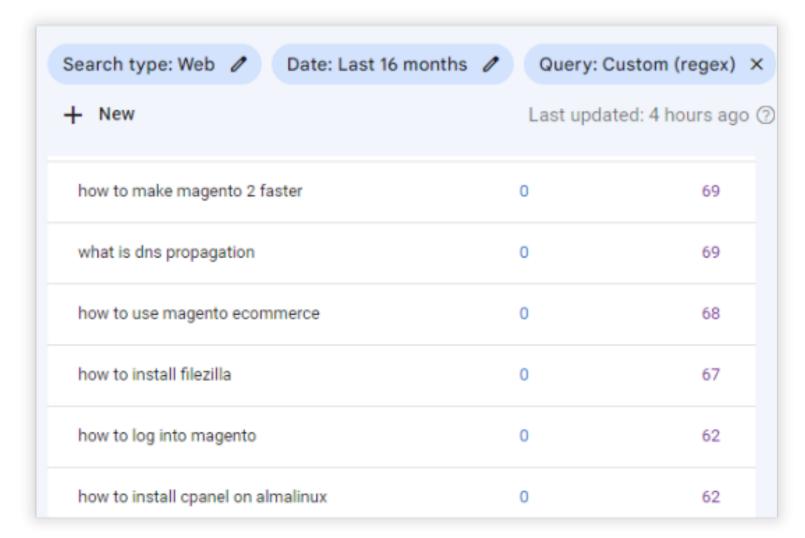

#### regex to pull out all the questions

^(how|what|why|when|where|which|who|whom)\b

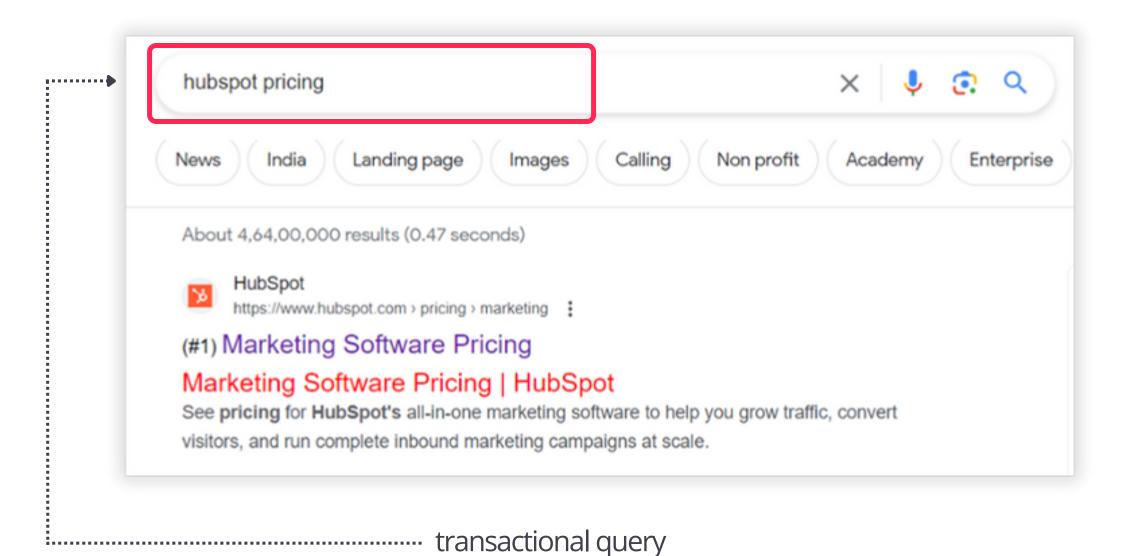

| Query            |                        |        |       |
|------------------|------------------------|--------|-------|
| FILTER           | COMPARE                |        |       |
| Custom (regex)   |                        |        |       |
| Matches regex    | _                      |        |       |
| ^(how what why w | hen where which who wh | om)\b  |       |
|                  |                        | CANCEL | APPLY |

## d. Transactional Queries

When the user searches any business to buy, renew, subscribe, etc. with modifiers like buy and purchase; the queries are transactional queries.

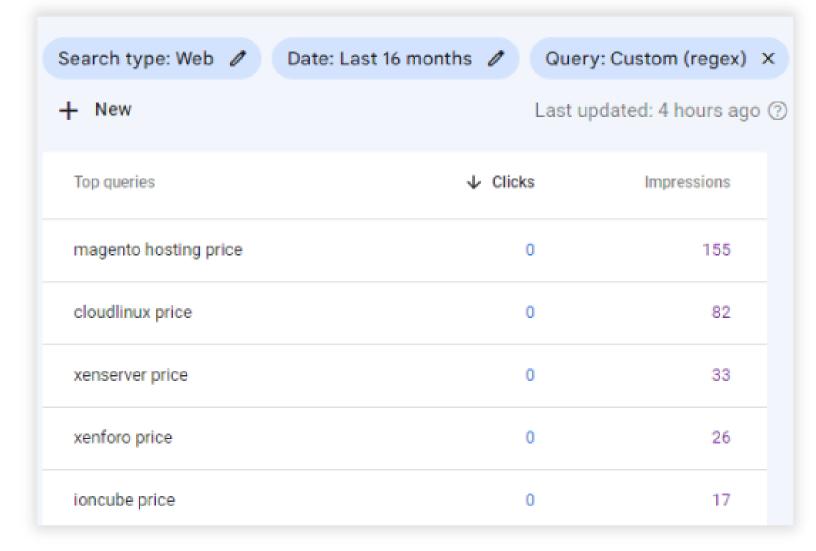

#### regex for transactional queries

#### \b(buy|purchase|order|price|discount|deal)\b

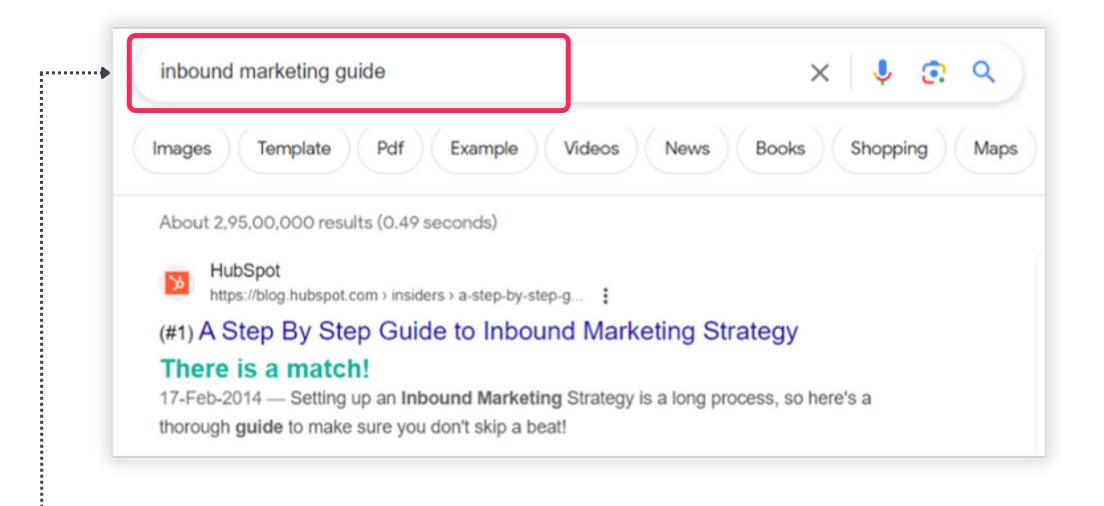

| Query                 |                        |        |       |
|-----------------------|------------------------|--------|-------|
| FILTER                | COMPARE                |        |       |
| Custom (regex)        | ▼ How to use regex     |        |       |
| Matches regex -       | _                      |        |       |
| \b(buy purchase order | price discount deal)\b |        |       |
|                       |                        | CANCEL | APPLY |

## e. Informational Queries

When the user seeks information or wants to learn more about a particular topic, they make informational searches.

······ informational query

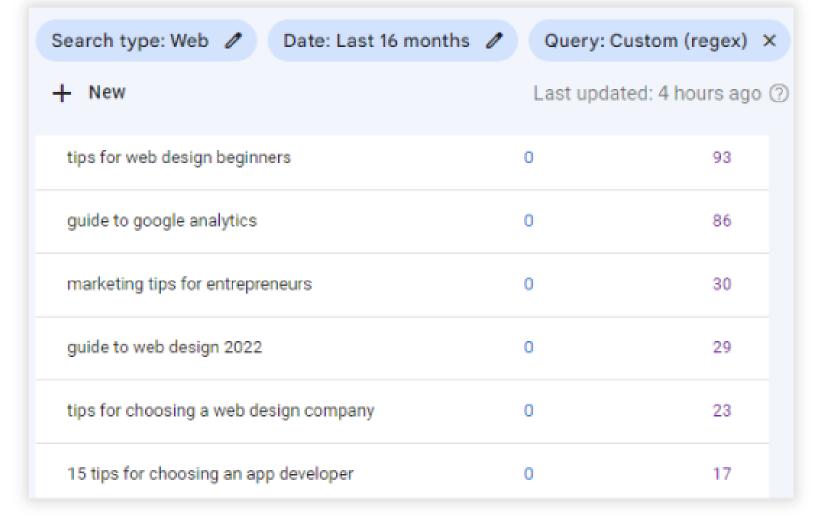

#### regex for informational guides

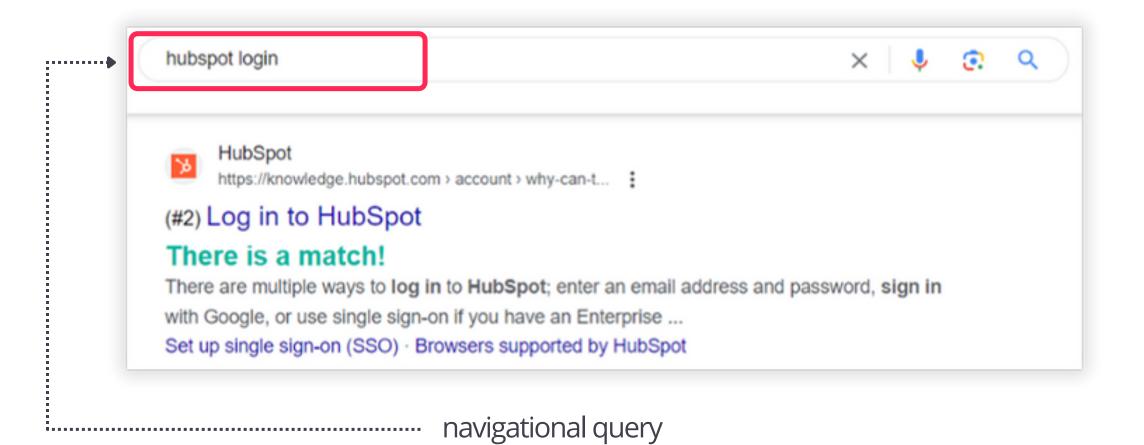

| Query                |                     |        |       |
|----------------------|---------------------|--------|-------|
| FILTER               | COMPARE             |        |       |
| Custom (regex)       | ── How to use regex |        |       |
| Matches regex        |                     |        |       |
| \b(how\sto tips\sfor | guide\sto)\b        |        |       |
|                      |                     | CANCEL | APPLY |

## f. Navigational Queries

When the user looks for a specific website or web page, they will make a navigational search.

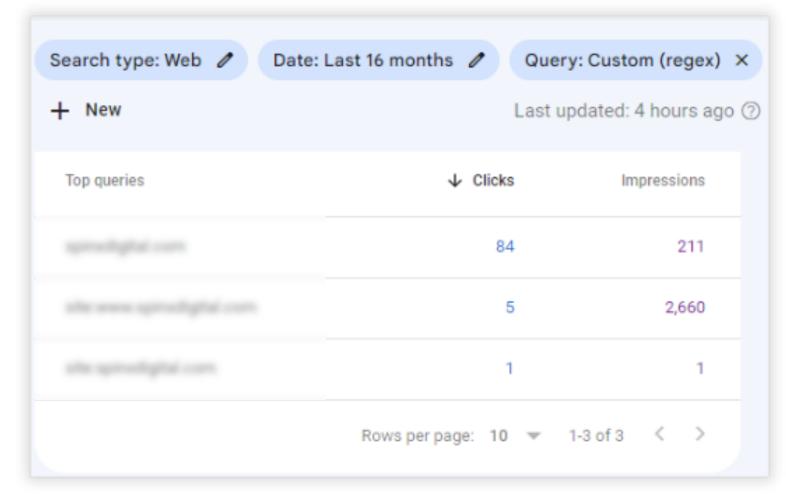

#### regex for brand site or login searches

#### \b(website1|website2|website3)\b

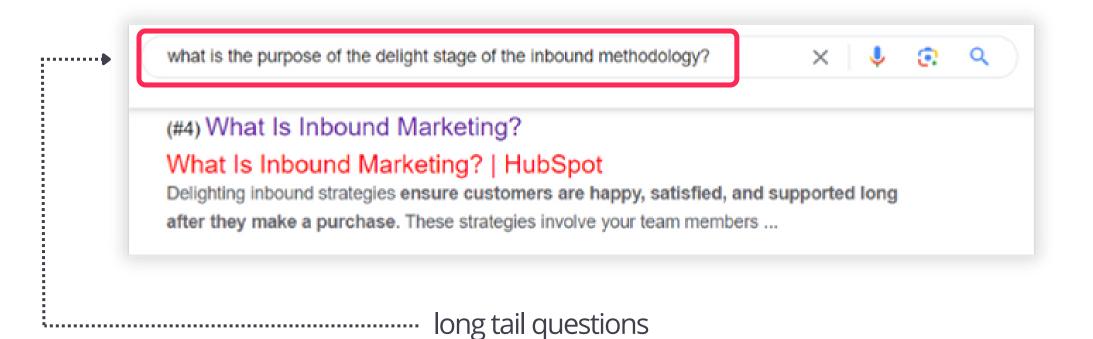

| Query          |                    |        |       |
|----------------|--------------------|--------|-------|
| FILTER         | COMPARE            |        |       |
| Custom (regex) | ▼ How to use regex |        |       |
| Matches regex  |                    |        |       |
|                |                    |        |       |
|                |                    | CANCEL | APPLY |

## g. Long-Tail Queries

When the user searches for something very specific, they'd use long-tail queries.

#### regex filters 4 to 100 words long queries

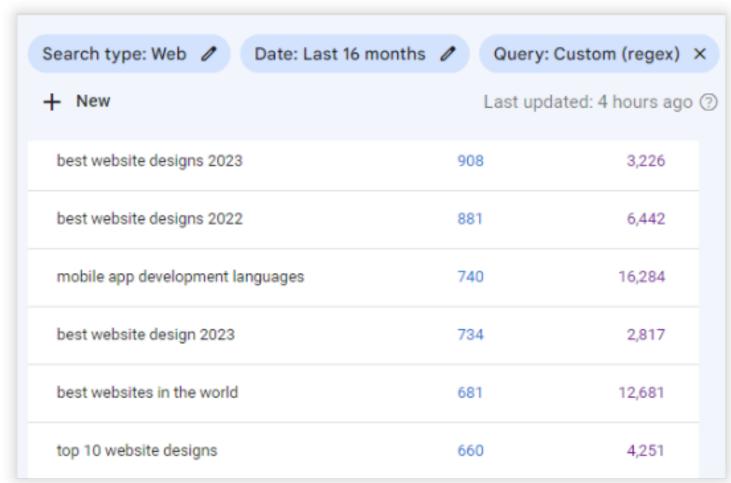

#### ^\b\w+(?:\s+\w+){3,99}\b\$

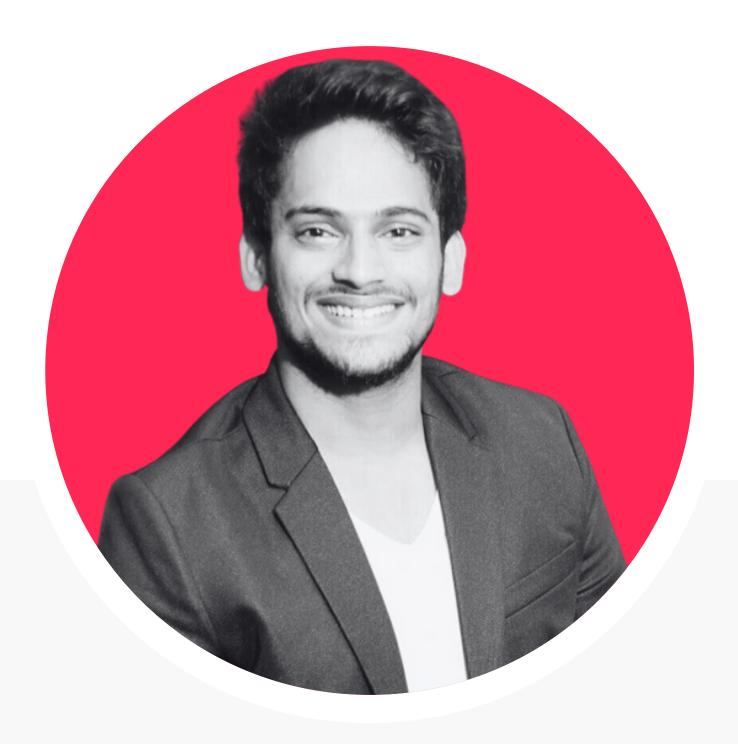

## Summary....

| Query Type            | Utilization Recommendations   |
|-----------------------|---|
|                       | - Optimize landing pages for branded keywords                         |
| Branded Queries       | - Create targeted ads using branded terms                             |
|                       | - Identify popular non-branded queries and create content around them |
| Non-Branded Queries   | - Optimize pages for non-branded keywords                             |
|                       | - Identify long-tail queries with high search volume                  |
| Long-Tail Queries     | - Create in-depth content to target these specific queries            |
|                       | - Develop comprehensive FAQ pages with answers to popular questions   |
| Question Queries      | - Create blog posts or videos that provide detailed explanations      |
|                       | - Optimize product pages with clear call-to-action buttons            |
| Transactional Queries | - Create targeted PPC campaigns for transactional queries             |
|                       | - Develop detailed guides, tutorials, or "how-to" content             |
| Informational Queries | - Create educational videos that answer informational queries         |
|                       | - Ensure easy navigation and clear site structure                     |
| Navigational Queries  | - Optimize meta tags and descriptions for better search results       |
