4. [Pantheon](https://pantheon.io) (pantheon.io)

Pantheon is a popular managed WordPress host that offers scalable infrastructure built on the Google Cloud Platform. In that respect, it's similar to Kinsta, though Pantheon uses a different tech stack on top of Google Cloud Platform.

In addition to a high-performing technology stack, Pantheon also builds in lots of convenient features like multiple staging environments, automatic backups and updates, and more.

Key features for high-traffic sites:

- Nginx web server.
- Server-level caching via Varnish and Redis.
- Elastic hosting, which makes it super easy to scale your site up to handle traffic spikes.
[*Learn more about Pantheon's elastic approach.*](#)
- Global CDN built into your hosting, powered by Fastly.
- Application performance monitoring via New Relic.
- Guaranteed 99.95% monthly uptime [*via an SLA*](#) but only for Elite plans.

Assign business value to the keyword

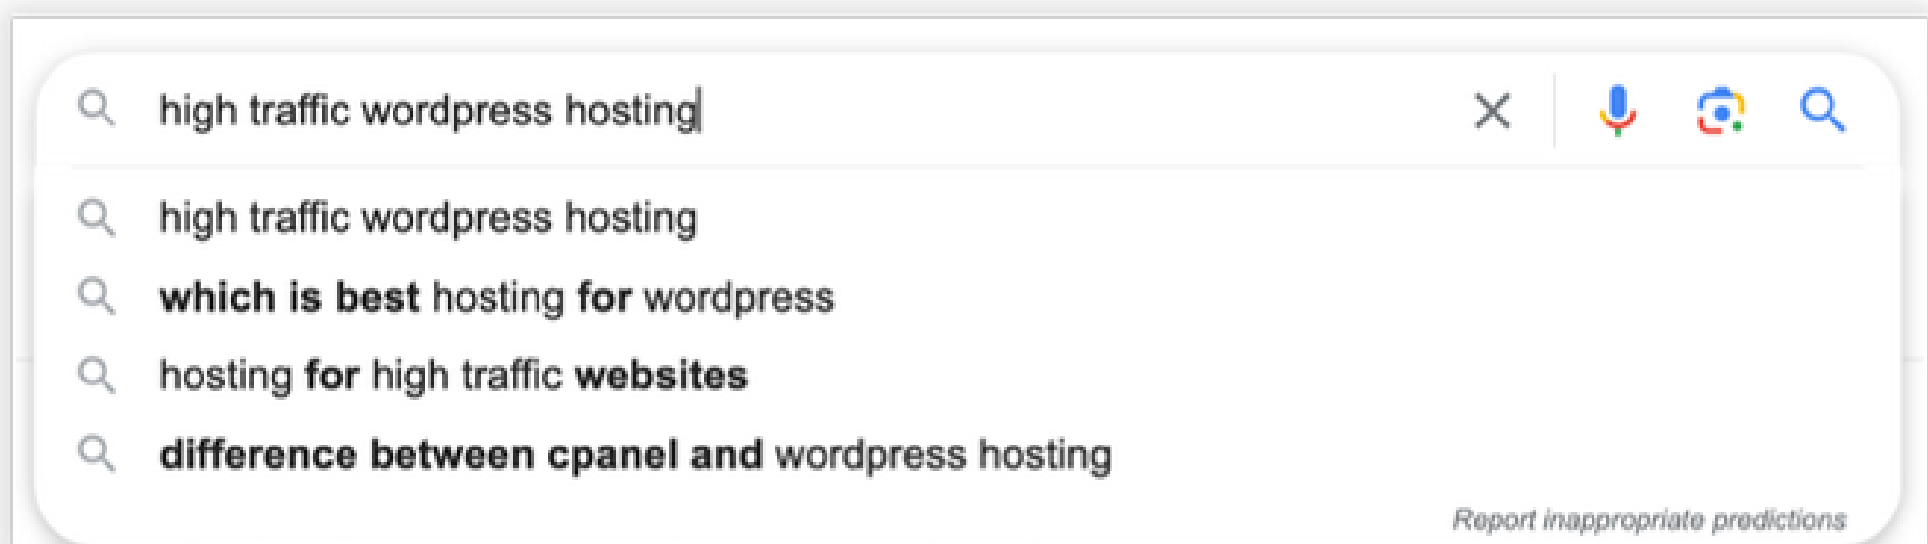

Bussiness Value	
1	There's no way to introduce your product
2	Worth mentioning, but difficult to promote your business here
3	Our product/service helps, but is not quite essential
4	Your product/service is an irreplaceable solution
